

NEBRASKANS **AGAINST** **GOVERNMENT** **OVERREACH**

PRESERVING OUR LIBERTY

October 10th, 2024

As we approach election day and early voting has begun, the political attacks and misinformation is at an all time high. Recently, a "red flag list of candidates" was circulated, targeting liberty minded candidates (pretty much if they're on the list, that's who you want), that included many manipulations of the truth and outright lies. We want to defend these candidates from the coordinated attacks of the far left.

Over the last several years the authors of these attacks have supported radical measures including Drag Queen story hours, the rights to unrestricted abortion, mutilation of children and their access to cross sex hormone treatments, inappropriate and downright sexually explicit content in K-12 schools, including the controversial sexual education regulations the State Board of Education proposed. They opposed the right to bear arms, elimination of property taxes, and stopping mask and vaccine mandates.

The real problem is that their attacks aren't limited to political activism and testimony at the legislature. They have also stalked candidates and members of conservative grassroots groups that they have deemed as "hate groups". They take pictures not just of these adults, but also their children and post them online. They have made threats toward business owners that are providing space for various grassroots groups and have made many attempts to cause people to lose their livelihoods.

We have to hand it to these loons. They're certainly a dedicated bunch.

The list above of transgressions committed is certainly far from a complete list. We regularly recommend to candidates who are targeted to ignore the unhinged attacks. If you have their attention, it means you're doing something right. Unfortunately, these posts have been shared by others that likely have no idea they're supporting and sharing the words of extreme liberals.

The authors of this "red flag list of candidates" don't deserve the attention so we won't be stating any names, but for the sake of the many phenomenal candidates that want to preserve our liberties, protect our children, and serve their communities, a clarification was warranted.

Support these candidates. Send them donations. Volunteer your time. Most importantly go vote and make sure your friends and family do, too! To view the list of liberty minded candidates that have worked hard to earn their constituents' support visit www.nago.group/electionguide.
