## A Chronology of Fluoridation - and more! (Received from Linda B 1-5-2025)

..."1931 ... Dr. Gerald Cox of the Mellon Institute, owners of ALCOA, would later solve the expensive disposal problem with toxic fluorides by convincing others that it could be dumped in the public water supply as a "preventative" for tooth decay."...

..."1957 Controversial statement from Oliver Kenneth Goff, June 22, 1957, a member of the Communist Party and the Young Communist League from May 2, 1936 to October 9, 1939, reveals he testified before the House Un-American Activities Committee in 1939, as to the implementation of the fluoridation of American public water supplies in the same way they used it as a brain tranquillizer at Soviet prison camps. Goff reflected that the Party leaders felt that it would bring about lethargy in the U.S, and keep the public docile during a steady encroachment of Communism. Also discussed, says Goff, was keeping a store of deadly fluoride near the water supplies where during a time of revolt it could be dumped wholesale into the water supply and either kill off the populace, or threaten them with liquidation, so that they would surrender to obtain fresh water. ..."

..."1971 Germany bans water fluoridation."...

..."1972 A letter from the Environmental Protection Agency, dated March 31, 1972, announced, "The EPA, in addition to its pollution abatement activities, supports and promotes the fluoridation of public water supplies through its water supply program ... this practice has been and is being thoroughly researched and safety is our prime consideration."..."

..."1978 A court case was won in Pennsylvania that proved fluoridation was harmful and resulted in a ban. It received great publicity, much to the concern of the American Dental Association and the industry."...

<http://www.infiniteunknown.net/2010/10/31/fluoride-a-chronological-history/>

Feb 2012 - HUMAN TOXICITY, ENVIRONMENTAL IMPACT AND LEGAL IMPLICATIONS OF WATER FLUORIDATION.

SUBMITTED TO: The Government of Ireland and the European Commission

Clearly therefore the only sensible, pragmatic, scientific, moral and legal approach is to end the policy of water fluoridation immediately.

Failure to do so, in light of the findings in this report, would represent a gross failure of responsibility and political leadership.

## Did citizens of Lincoln, Nebraska vote for fluoridation in 1970?

# Nebraska Fluoridation Vote 1970

In 1970, fluoridation of Lincoln's water supply began, but **there is no specific mention of a public vote at that time**. According to the information available, fluoridation started following a vote of the people in the past, which is how communities dealt with deciding on this topic many years ago. However, the exact year of the vote is not specified. The state of Nebraska passed a law in 2008 requiring all Nebraska cities with populations over 1,000 to add fluoride chemicals into water supplies unless cities opt-out by 2010. This law was passed over the Governor's veto and was lobbied by the Nebraska Dental Association and supported by the American Dental Association (ADA).
